

Dear Technology Park Tenant and Landowner

As you are probably aware the Town of Victoria Park have implemented a Parking Management Plan within the Town that incorporates changes to Technology Park [Bentley parking arrangements](#). These changes will provide a more formal structure for parking and traffic management within Technology Park.

On the 1st of July, contractors will commence the first phase of the [Parking Plan](#) which will involve clearly marking each of the roads within the [Park](#) with yellow lines to denote no parking areas.

The changes being implemented by the Town of Victoria Park are summarised as follows:

- Any kerbside that does not have a yellow line can be used for parking
- The new yellow lines will indicate a No Stopping Area. Vehicles parking in them can receive a \$120 penalty
- Please contact the Town if you notice any issues with this change (08 9311 8111)
- Jarrah Road has an abundance of alternative parking
- The Town will be installing further parking changes in the area in accordance with our [Parking Management Plan](#) but will inform employers through Burgess Rawson before this occurs. These changes will include a blanket no parking on verge restriction that will include prohibited parking on grassed buffer areas around the park.
- The Town encourages employers to support staff to use alternative transport and has a range of [possible strategies on our website](#).

The Town has identified that footpaths need to be upgraded/built to further assist park occupants moving from their vehicles to their place of work and it has established a working group with Horizon Power, Burgess Rawson and the Department of Commerce to recommend a plan of action.

Regards

Graeme Perry
